

Innovative Business Coin (IBC)

Whitepaper

Innovative Business Coin (IBC)

Overview

Innovative Business Coin (IBC) is a next-generation digital token built on the Ethereum blockchain designed to support and enhance corporate and enterprise business operations.

Token Details

Name: Innovative Business Coin

Symbol: IBC

Contract Address: 0xb187eA6C14cE4E90Cb067CBbe454FB1364e38606

Block Explorer:

<https://etherscan.io/address/0xb187eA6C14cE4E90Cb067CBbe454FB1364e38606>

Total Supply: 5,000,000 IBC

Blockchain: Ethereum

Token Standard: ERC-20

Presale Details

Start: 12:00 AM, 1st June

Duration: 90 Days

Presale Contract: 0x20e607f821b1D4C59cA0D93ce9F2D69bdD0625F0

Accepted Currency: ETH

Token Distribution: Immediate post-purchase via smart contract

Technical Specifications

Confirmation Time: 357 ms

Blocks Per Second (BPS): 1

Confirmations Per Second (CPS): 1

Backlog: 0

Use Cases

- B2B Cross-border Payments
- Supply Chain Finance

- Invoice and Accounting Automation
- Partner Loyalty Programs

Roadmap

Q2 2025 – Launch & Foundation

- Deploy IBC smart contract on Ethereum Mainnet
- Launch presale (start: 28 May 2025, duration: 90 days)
- Release whitepaper and promotional materials (PDF + Website)
- Community building: Telegram, Twitter, Discord
- Smart contract audits and security verification
- Initial strategic partnerships (ERP, fintech consultancies)

Q3 2025 – Market Penetration & Listings

- Conclude presale and distribute tokens
- List IBC on major DEXs (Uniswap, Sushiswap)
- Apply for Tier-2 CEX listings
- Launch token analytics dashboard
- Begin enterprise outreach program for onboarding
- Initiate “IBC for Business” campaign
- Expand developer docs and SDK

Q4 2025 – Integration & Expansion

- Release business-focused APIs & SDKs
- Launch Enterprise Pilot Program
- Enable staking or token-locking for services
- Launch DAO governance structure
- IBC rewards system (enterprise loyalty & referrals)

Q1 2026 – Ecosystem Growth

- Multichain bridge deployment
- Launch Business Finance Hub (DeFi tools)
- Integrate with ERP platforms (e.g., SAP, Oracle)
- Regulatory compliance tools (KYC/AML APIs)
- Stablecoin partnerships
- Hackathons and grant program

Q2 2026 and Beyond – Maturity & Global Adoption

- Onboard 100+ businesses
- Publish real-world use cases
- Expand into LATAM, EU, MENA
- Performance, scalability upgrades
- IBC as standard for smart payment systems

Security & Governance

- Smart Contract Audits
- DAO-based Governance Transition
- KYC/AML for Enterprise Integration

Conclusion

IBC is a dedicated blockchain token designed to enable fast, secure, and efficient business transactions for the modern enterprise. Built on Ethereum with ultra-fast confirmation, zero backlog, and complete transparency, IBC is a corporate-ready crypto asset for the future.
